PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

***Response to Arguments***

Applicant's arguments filed May 18, 2009 have been fully considered but they are not persuasive.

Applicant's comments have been directed to the differences between how the Johanson illumination system works and how Applicant's system is different. Applicant states that in his invention the reflector system "encloses" the light source and the two reflectors make up the system to redirect the light rays back and forth until they exit an aperture. However, that language is not in Claim 1. The positioning of the two reflectors is not set forth other than to state that their focal points are coincident. The "aperture" in the claim language is not distinguished in any manner. Therefore the aperture shown in Johanson is readable as the claimed aperture.

***Conclusion***

Any inquiry concerning this communication or earlier communications should be directed to Examiner Neils at (571) 272-2377 on a Monday, Tuesday or Thursday. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jong (James) Lee can be reached on (571) 272-7044.
